

1. Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.

HTML Tag: Div

CSS Class: x1ey2m1c xtijo5x x1o0tod x10l6tqk x13vifvy

2. Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.

```
<!DOCTYPE html>

<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">
  <title>My Profile</title>

  <style>
    body{
      font-family: Arial, sans-serif;
      background:#f4f4f4;
      display:flex;
      justify-content:center;
      align-items:center;
      height:100vh;
      margin:0;
    }

    .profile{
      background:#fff;
      padding:30px;
      border-radius:12px;
      text-align:center;
      box-shadow:0 5px 15px rgba(0,0,0,0.2);
      max-width:350px;
    }

    img{
      width:150px;
      height:150px;
      border-radius:50%;
      object-fit:cover;
      border:4px solid #007BFF;
    }
  </style>
</head>
<body>
  <div class="profile">
    <h1>My Profile</h1>
    <p>A short bio</p>
    <img alt="Profile picture" data-bbox="180 800 250 900"/>
  </div>
</body>
</html>
```

```

        h1{
            margin:20px 0 10px;
            color:#333;
        }

        p{
            color:#666;
            line-height:1.6;
        }
    </style>
</head>
<body>

    <div class="profile">
        

        <h1>Ridham Dolera</h1>

        <p>
            Hello! I'm Ridham Dolera, a passionate web developer and
            technology enthusiast. I enjoy building responsive
websites,
            learning new programming skills, and creating modern UI/UX
            designs.
        </p>
    </div>

</body>
</html>

```

3. Use Chrome DevTools to change the background color of your name (in myprofile.html) to any color you like, live in the browser, without

editing the HTML file.

4. Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).

Parent → Child Relationships

- html
 - head
 - title
 - body
 - h1
 - img
 - p

This diagram includes at least 3 levels:

1. html
2. body
