

1. Create an HTML form for a Flipkart-style product review, including input fields for username, rating (as a dropdown from 1 to 5), and a textarea for the review message. Use appropriate labels for each field.

```
2. <h2>Flipkart Product Review Form</h2>
3.
4. <form>
5.
6.     <label for="username">Username:</label><br>
7.     <input type="text" id="username" name="username"><br><br>
8.
9.     <label for="rating">Rating:</label><br>
10.    <select id="rating" name="rating">
11.        <option value="">Select Rating</option>
12.        <option value="1">1 - Poor</option>
13.        <option value="2">2 - Fair</option>
14.        <option value="3">3 - Good</option>
15.        <option value="4">4 - Very Good</option>
16.        <option value="5">5 - Excellent</option>
17.    </select><br><br>
18.
19.    <label for="review">Review Message:</label><br>
20.    <textarea id="review" name="review" rows="5" cols="40"
21.        placeholder="Write your review here..."></textarea><br><br>
22.    <input type="submit" value="Submit Review">
23.
24.</form>
```

2. Add HTML5 validation attributes to your review form so that username is required, rating must be selected, and the review message must be at least 20 characters long.

Hint: Use required, minlength, and a default unselectable option for the dropdown.

```
<h2>Flipkart Product Review Form</h2>

<form>

    <label for="username">Username:</label><br>
    <input type="text" id="username" name="username" required>
    <br><br>

    <label for="rating">Rating:</label><br>
    <select id="rating" name="rating" required>
        <option value="" selected disabled>Select Rating</option>
        <option value="1">1 - Poor</option>
        <option value="2">2 - Fair</option>
        <option value="3">3 - Good</option>
```

```

        <option value="4">4 - Very Good</option>
        <option value="5">5 - Excellent</option>
    </select>
    <br><br>

    <label for="review">Review Message:</label><br>
    <textarea
        id="review"
        name="review"
        rows="5"
        cols="40"
        minlength="20"
        required
        placeholder="Write at least 20 characters..."></textarea>
    <br><br>

    <input type="submit" value="Submit Review">

</form>

```

**3. Modify your form to use the POST method and, after submitting a test review, open the DevTools Network tab to preview the POST request data sent by your form.

Hint: Look for the form submission request and expand the payload/details to see your input values.**

```

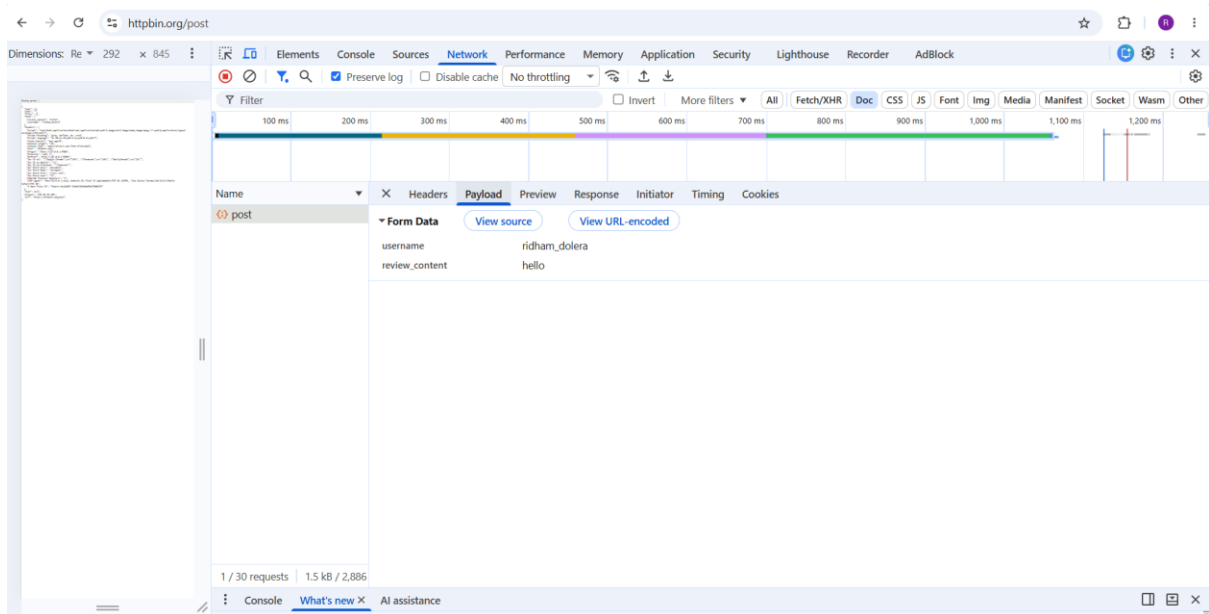

<h2>Flipkart Product Review Form</h2>

<!-- Make sure your form tag looks like this -->
<form action="https://httpbin.org/post" method="POST">
    <!-- Your review inputs (e.g., name, rating, comment) go here -->
    <label for="reviewerName">Name:</label>
    <input type="text" id="reviewerName" name="username">

    <label for="reviewText">Review:</label>
    <textarea id="reviewText" name="review_content"></textarea>

    <button type="submit">Submit Review</button>
</form>

```

4. Build a Zomato-style food order form with inputs for user name, a select dropdown for food item (at least 3 options), quantity (number input), and a textarea for delivery instructions. Ensure all fields are labeled and use required validation.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Zomato Food Order Form</title>

  <style>
    *{
      margin:0;
      padding:0;
      box-sizing:border-box;
      font-family:Arial, Helvetica, sans-serif;
    }

    body{
      background:#f8f8f8;
      display:flex;
      justify-content:center;
      align-items:center;
      min-height:100vh;
      padding:20px;
    }

    .order-form{
      width:100%;
      max-width:500px;
      background:#fff;
```

```
padding:30px;
border-radius:12px;
box-shadow:0 8px 20px rgba(0,0,0,0.15);
}

h2{
  text-align:center;
  color:#e23744;
  margin-bottom:25px;
}

.form-group{
  margin-bottom:20px;
}

label{
  display:block;
  margin-bottom:8px;
  font-weight:bold;
  color:#333;
}

input,
select,
textarea{
  width:100%;
  padding:12px;
  border:1px solid #ccc;
  border-radius:8px;
  font-size:16px;
  transition:0.3s;
}

input:focus,
select:focus,
textarea:focus{
  outline:none;
  border-color:#e23744;
  box-shadow:0 0 6px rgba(226,55,68,0.3);
}

textarea{
  resize:vertical;
}

button{
  width:100%;
  padding:14px;
```

```

        background:#e23744;
        color:#fff;
        border:none;
        border-radius:8px;
        font-size:17px;
        cursor:pointer;
        transition:0.3s;
    }

    button:hover{
        background:#c62839;
    }
</style>
</head>
<body>

<div class="order-form">

    <h2>Zomato Food Order</h2>

    <form action="#" method="post">

        <div class="form-group">
            <label for="username">User Name</label>
            <input
                type="text"
                id="username"
                name="username"
                placeholder="Enter your name"
                required>
        </div>

        <div class="form-group">
            <label for="food">Food Item</label>
            <select id="food" name="food" required>
                <option value="">-- Select Food Item --</option>
                <option value="Pizza">Pizza</option>
                <option value="Burger">Burger</option>
                <option value="Biryani">Biryani</option>
                <option value="Pasta">Pasta</option>
                <option value="Sandwich">Sandwich</option>
            </select>
        </div>

        <div class="form-group">
            <label for="quantity">Quantity</label>
            <input
                type="number"

```

```

        id="quantity"
        name="quantity"
        min="1"
        max="20"
        placeholder="Enter quantity"
        required>
    </div>

    <div class="form-group">
        <label for="instructions">Delivery Instructions</label>
        <textarea
            id="instructions"
            name="instructions"
            rows="4"
            placeholder="Enter delivery instructions..."
            required></textarea>
    </div>

    <button type="submit">Place Order</button>

</form>

</div>

</body>
</html>

```

5. Add a disabled input field to your food order form that displays a fixed order ID (e.g., ORD12345) and explain in a comment why this field should be disabled for users.

```

<!--
The Order ID is generated by the system and should not be editable by users.
Using the disabled attribute prevents users from modifying this fixed value.
-->

<div class="form-group">
    <label for="orderId">Order ID</label>
    <input
        type="text"
        id="orderId"
        name="orderId"
        value="ORD12345"
        disabled>
</div>

```
