

1. Create an HTML file for a Flipkart-style product card and apply inline CSS to set a unique background color and font size for the product title only.

```
2. <!DOCTYPE html>
3. <html lang="en">
4. <head>
5.     <meta charset="UTF-8">
6.     <meta name="viewport" content="width=device-width, initial-scale=1.0">
7.     <title>Flipkart Product Card</title>
8. </head>
9. <body style="font-family: Arial, sans-serif; background-color: #f1f3f6;
padding: 30px;">
10.
11.     <div style="width: 320px; background: white; border: 1px solid #ddd;
border-radius: 10px; padding: 20px; box-shadow: 0 4px 10px
rgba(0,0,0,0.15);">
12.
13.         
16.
17.         <!-- Inline CSS applied only to the product title -->
18.         <h2 style="background-color:#ffe082; font-size:28px; padding:10px;
border-radius:6px; color:#222;">
19.             Samsung Galaxy S25 5G
20.         </h2>
21.
22.         <p><strong>Price:</strong> ₹74,999</p>
23.
24.         <p>
25.             Experience a stunning AMOLED display, powerful processor,
26.             advanced camera system, and long-lasting battery.
27.         </p>
28.
29.         <button style="background:#2874f0; color:white; border:none;
padding:10px 20px; border-radius:5px; cursor:pointer;">
30.             Buy Now
31.         </button>
32.
33.     </div>
34.
35. </body>
36. </html>
```

2. Build a Myntra-like offer banner using internal CSS (inside a <style> tag) to set a custom font family, text color, and background color for the banner text.

```
<!DOCTYPE html>
```

```

<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Myntra Offer Banner</title>

  <style>
    body{
      margin:0;
      font-family:Arial, Helvetica, sans-serif;
      background:#f5f5f5;
    }

    .offer-banner{
      background-color:#ff3f6c;
      color:#ffffff;
      font-family:'Trebuchet MS', Arial, sans-serif;
      text-align:center;
      padding:25px;
      font-size:28px;
      font-weight:bold;
      letter-spacing:1px;
    }

    .offer-banner span{
      color:#ffe082;
    }
  </style>
</head>
<body>

  <div class="offer-banner">
    🛍️ MEGA FASHION SALE! <span>Flat 50% OFF</span> on Top Brands | Free
    Shipping on Orders Above ₹999
  </div>

</body>
</html>

```

3. Create a separate CSS file named styles.css and link it to your HTML file. Use external CSS to style all <button> elements with a Zomato-inspired color, rounded corners, and a hover effect that changes the background color.

```

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Zomato Button Styling</title>

```

```

    <!-- Link External CSS -->
    <link rel="stylesheet" href="styles.css">
</head>
<body>

    <h2>Zomato Food Order</h2>

    <button type="button">Order Now</button>
    <button type="button">View Menu</button>
    <button type="button">Add to Cart</button>

</body>
</html>

```

Style.CSS

```

/* General Page Styling */
body{
    font-family: Arial, Helvetica, sans-serif;
    background-color: #f8f8f8;
    text-align: center;
    margin-top: 80px;
}

/* Style All Buttons */
button{
    background-color: #e23744; /* Zomato-inspired red */
    color: white;
    border: none;
    padding: 12px 24px;
    margin: 10px;
    font-size: 16px;
    border-radius: 8px;
    cursor: pointer;
    transition: background-color 0.3s ease;
}

/* Hover Effect */
button:hover{
    background-color: #c62839; /* Darker red on hover */
}

```

4. Write CSS selectors to style all elements with the class 'playlist-item' (for a Spotify playlist page) to have a dark background and white text. Then, add a rule to highlight the currently playing song with a different color using a unique id selector.

HTML Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Spotify Playlist</title>
  <link rel="stylesheet" href="style2.css">
</head>
<body>

  <div class="playlist-item">Blinding Lights - The Weeknd</div>

  <div class="playlist-item" id="currently-playing">
    Shape of You - Ed Sheeran 🎵
  </div>

  <div class="playlist-item">Believer - Imagine Dragons</div>

  <div class="playlist-item">Perfect - Ed Sheeran</div>

</body>
</html>
```

CSS:

```
/* Style all playlist items */
.playlist-item{
  background-color: #121212; /* Spotify dark background */
  color: #ffffff; /* White text */
  padding: 12px;
  margin: 8px 0;
  border-radius: 6px;
  font-family: Arial, sans-serif;
}

/* Highlight the currently playing song */
#currently-playing{
  background-color: #1DB954; /* Spotify green */
  color: #000000; /* Black text for contrast */
  font-weight: bold;
}
```

5. Implement a simple light/dark mode switch for a BookMyShow movie detail page using internal CSS and a toggle button. When the button is clicked, switch between light and dark color themes for the page.

Hint: Use JavaScript to add or remove a 'dark-mode' class on the <body> and define the color themes in CSS.

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>BookMyShow Movie Detail</title>

<style>
*{
    margin:0;
    padding:0;
    box-sizing:border-box;
    font-family:Arial, Helvetica, sans-serif;
}

body{
    background:#f5f5f5;
    color:#222;
    transition:0.4s;
}

/* Dark Mode */
body.dark-mode{
    background:#121212;
    color:#ffffff;
}

header{
    background:#d32f2f;
    color:white;
    padding:20px;
    display:flex;
    justify-content:space-between;
    align-items:center;
}

header h1{
    font-size:28px;
}

.toggle-btn{
    background:white;
```

```
    color:#d32f2f;
    border:none;
    padding:10px 18px;
    border-radius:6px;
    cursor:pointer;
    font-weight:bold;
}

.toggle-btn:hover{
    opacity:0.9;
}

.movie-card{
    max-width:900px;
    margin:40px auto;
    background:white;
    display:flex;
    gap:25px;
    padding:20px;
    border-radius:12px;
    box-shadow:0 5px 15px rgba(0,0,0,.15);
    transition:0.4s;
}

.dark-mode .movie-card{
    background:#1f1f1f;
}

.movie-card img{
    width:250px;
    border-radius:10px;
}

.movie-info h2{
    margin-bottom:15px;
}

.movie-info p{
    margin-bottom:12px;
    line-height:1.6;
}

.book-btn{
    margin-top:15px;
    background:#f84464;
    color:white;
    border:none;
    padding:12px 20px;
```

```

    border-radius:6px;
    cursor:pointer;
    font-size:16px;
}

.book-btn:hover{
    background:#d62d4d;
}

@media(max-width:768px){

.movie-card{
    flex-direction:column;
    text-align:center;
}

.movie-card img{
    width:100%;
    max-width:300px;
    margin:auto;
}

}
</style>

</head>
<body>

<header>
    <h1>🎬 BookMyShow</h1>

    <button class="toggle-btn" onclick="toggleMode()">
        🌙 Dark Mode
    </button>
</header>

<div class="movie-card">

    

    <div class="movie-info">

        <h2>Avengers: Endgame</h2>

        <p><strong>Genre:</strong> Action, Adventure, Sci-Fi</p>

        <p><strong>Duration:</strong> 3h 1m</p>

```

```
<p>
  After the devastating events of Infinity War,
  the Avengers assemble one final time to restore
  balance and defeat Thanos.
</p>

<button class="book-btn">
  Book Tickets
</button>

</div>

</div>

<script>

function toggleMode(){

  document.body.classList.toggle("dark-mode");

  const btn=document.querySelector(".toggle-btn");

  if(document.body.classList.contains("dark-mode")){
    btn.innerHTML="☀️ Light Mode";
  }else{
    btn.innerHTML="🌙 Dark Mode";
  }
}

</script>

</body>
</html>
```
