

1. **Create an HTML file with a container div and 4 images of your favorite apps (Instagram, WhatsApp, Zomato, Spotify) as social icons. Use CSS Flexbox to display them in a row with equal spacing using justify-content.**

```
2.     <!DOCTYPE html>
3.     <html lang="en">
4.     <head>
5.         <meta charset="UTF-8">
6.         <meta name="viewport" content="width=device-width, initial-

71. </head>
72. <body>
73.
74. <div class="container">

2. Build a horizontal playlist bar like Spotify using Flexbox: add 5 song cards with song name and artist, and use align-items to vertically center the text in each card.

```

<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Spotify Playlist Bar</title>

<style>
*{
    margin:0;
    padding:0;
    box-sizing:border-box;
    font-family:Arial, Helvetica, sans-serif;
}

body{
    background:#121212;
    color:#fff;
    padding:40px;
}

h1{

```

```
    text-align:center;
    color:#1DB954;
    margin-bottom:30px;
}

/* Playlist Bar */
.playlist{
    display:flex;
    justify-content:space-between;
    gap:20px;
    overflow-x:auto;
}

/* Song Card */
.song-card{
    display:flex;
    align-items:center;      /* Vertically centers the text */
    background:#1e1e1e;
    border-radius:10px;
    min-width:220px;
    padding:15px;
    transition:0.3s;
    cursor:pointer;
}

.song-card:hover{
    background:#2c2c2c;
    transform:translateY(-5px);
}

/* Album Image */
.song-card img{
    width:60px;
    height:60px;
    border-radius:8px;
    margin-right:15px;
}

/* Song Details */
.song-info h3{
    font-size:18px;
    margin-bottom:6px;
}

.song-info p{
    color:#b3b3b3;
    font-size:14px;
}
```

```
</style>

</head>
<body>

<h1>🎵 Spotify Playlist</h1>

<div class="playlist">

  <div class="song-card">
    
    <div class="song-info">
      <h3>Blinding Lights</h3>
      <p>The Weeknd</p>
    </div>
  </div>

  <div class="song-card">
    
    <div class="song-info">
      <h3>Believer</h3>
      <p>Imagine Dragons</p>

  </div>

  <div class="song-card">
    
    <div class="song-info">
      <h3>Perfect</h3>
      <p>Ed Sheeran</p>
    </div>
  </div>

  <div class="song-card">
    
    <div class="song-info">
      <h3>Levitating</h3>
      <p>Dua Lipa</p>

```

```
</div>

</body>
</html>
```

3. Design a Flipkart-style product grid: create a section with 6 product cards (use placeholder images and product names), and use CSS Grid to arrange them in 3 columns and 2 rows.

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Flipkart Product Grid</title>

<style>
*{
    margin:0;
    padding:0;
    box-sizing:border-box;
    font-family:Arial, Helvetica, sans-serif;
}

body{
    background:#f1f3f6;
    padding:40px;
}

h1{
    text-align:center;
    color:#2874f0;
    margin-bottom:30px;
}

/* Product Grid */
.product-grid{
    display:grid;
    grid-template-columns:repeat(3, 1fr);
    grid-template-rows:repeat(2, auto);
    gap:20px;
    max-width:1000px;
    margin:auto;
}

/* Product Card */
.product-card{
    background:#fff;
```

```

    border-radius:10px;
    overflow:hidden;
    text-align:center;
    box-shadow:0 4px 12px rgba(0,0,0,0.15);
    transition:0.3s;
}

.product-card:hover{
    transform:translateY(-5px);
    box-shadow:0 8px 18px rgba(0,0,0,0.2);
}

.product-card img{
    width:100%;
    height:200px;
    object-fit:cover;
}

.product-card h3{
    padding:15px;
    color:#333;
    font-size:18px;
}

/* Responsive Layout */
@media(max-width:768px){
    .product-grid{
        grid-template-columns:repeat(2,1fr);
    }
}

@media(max-width:500px){
    .product-grid{
        grid-template-columns:1fr;
    }
}
</style>

</head>
<body>

<h1>🛒 Flipkart Product Grid</h1>

<section class="product-grid">

    <div class="product-card">
        

```

```

        <h3>Wireless Headphones</h3>
    </div>

    <div class="product-card">
        
        <h3>Smart Watch</h3>
    </div>

    <div class="product-card">
        
        <h3>Bluetooth Speaker</h3>
    </div>

    <div class="product-card">
        
        <h3>Gaming Mouse</h3>
    </div>

    <div class="product-card">
        
        <h3>Laptop Backpack</h3>
    </div>

    <div class="product-card">
        
        <h3>Power Bank</h3>
    </div>

</section>

</body>
</html>

```

4. Make your product grid responsive: use grid-template-columns to show 3 columns on desktop, 2 columns on tablet, and 1 column on mobile screens.
Hint: Use CSS media queries to change grid-template-columns based on screen width.

```

<!DOCTYPE html>

    margin:0;
    padding:0;

    padding:30px;
}

    color:#2874f0;
    margin-bottom:30px;
}

/* Product Grid */
.product-grid{
    display:grid;
    grid-template-columns:repeat(3, 1fr); /* Desktop: 3 columns */
    gap:20px;
    max-width:1100px;
    margin:auto;
}

/* Product Card */

    border-radius:10px;
    overflow:hidden;
    text-align:center;
    box-shadow:0 4px 12px rgba(0,0,0,0.15);
    transition:0.3s;
}

.product-card:hover{
    transform:translateY(-5px);
    box-shadow:0 8px 18px rgba(0,0,0,0.2);
}

.product-card img{

  font-size:18px;
}

/* Tablet: 2 columns */
@media (max-width:768px){
  .product-grid{
    grid-template-columns:repeat(2, 1fr);
  }
}

/* Mobile: 1 column */
@media (max-width:480px){
