

1. Create a Bootstrap layout for a Flipkart-style product card page: use a container with a row, and display three product cards side by side using the grid system's columns.

```
<!DOCTYPE html>

rel="stylesheet">

  <style>
    body{
      background:#f1f3f6;
    }

    .product-card{
      transition:0.3s;
    }

    .product-card:hover{
      transform:translateY(-5px);
      box-shadow:0 8px 20px rgba(0,0,0,0.15);
    }

    .price{
      color:#388e3c;
      font-size:1.2rem;
      font-weight:bold;
    }

    .btn-buy{
      background:#2874f0;
      color:#fff;
    }

    .btn-buy:hover{
      background:#0d6efd;
      color:#fff;
    }
  </style>
</head>
```

```

2. Build a Zomato restaurant listing page using Bootstrap grid: arrange two restaurant cards per row, each card showing a restaurant name and a short description.
Hint: Use col-6 inside a row to get two equal columns per row.

```

    .restaurant-card{

3. Design a BookMyShow-like movie details section using Bootstrap: place a movie poster image in one column and movie details (title, genre, rating, and a 'Book Now' button) in the second column, using the grid system.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">

    body{
      background:#f5f5f5;
    }

    .movie-section{
      background:#ffffff;
      border-radius:15px;
      box-shadow:0 5px 20px rgba(0,0,0,0.15);
      padding:30px;
      margin-top:50px;

    .rating{
      display:inline-block;
      background:#28a745;
      color:white;
      padding:6px 12px;
      border-radius:6px;
      font-weight:bold;
      margin:10px 0;
    }

    .book-btn{

        .book-btn:hover{

4. Refactor your 2-column layout to be mobile-friendly: make the columns stack vertically on screens smaller than 576px using Bootstrap's responsive grid classes.
Hint: Try using col-12 for xs and col-6 for md and above.

```
